SUMMARY

Music educator and self-taught web developer transitioning into front-end/full-stack development, backed by a working Unity/C# application and ongoing formal coursework toward an A.S. in Web Development. Skilled at breaking complex systems into manageable parts — the same discipline used to build a rules-accurate card game app from scratch and to design curriculum for students of all levels. Looking for an entry-level developer role where structured problem-solving and fast learning translate directly into shipped work.

SKILLS

Languages & Tools: HTML5, CSS3 (Flexbox, Grid, responsive design, animations/transitions), C#, Git/GitHub, VS Code, Unity 6

Currently Learning: JavaScript (LBCC COSW 200), SQL/Database Design (LBCC COSP 38), PHP/MySQL, front-end frameworks

Concepts: OOP, state management, singleton architecture, responsive/mobile-first layout, accessibility basics

Transferable: Breaking down complex systems for different audiences, structured curriculum design, project/event coordination, calm execution under time pressure, clear communication across skill levels

PROJECTS

Marvel Champions: Spider-Man vs. Rhino — Unity/C# Game In development

Self-directed digital solo app for Marvel Champions: The Card Game, built from the ground up while learning Unity and C#. Singleton manager architecture (CardEffectManager, PlayerDeckManager, VillainManager, EncounterManager, and others) with UI views subscribing to game state, effectId-based routing, and async callbacks for player decisions like targeting. Past a dozen implementation milestones.

Personal Portfolio Site — patreekare.github.io

Designed and built with HTML/CSS, deployed via GitHub Pages. Responsive layout, custom design system, organized project showcase.

Coursework Projects LBCC COSW 10/20

Responsive Web Design, CSS Grid layout, Product Landing Page (forms, embedded media, FreeCodeCamp spec), CSS Animations & Transitions — demos linked from portfolio site.

EXPERIENCE

Music Instructor — *Jammin' Music, Long Beach, CA* Jan 2020 – Present

- Designed and iteratively refined a structured curriculum across guitar, voice, piano, and ukulele for a 30+ student roster with varied learning styles
- Independently planned and executed monthly recital events end-to-end — scheduling, logistics, performance readiness
- Collaborated with fellow instructors to debug and improve curriculum based on real student outcomes

Music Instructor — *Arts Alive, Carson, CA* Jun 2020 – Jun 2023

- Built and delivered structured, age-appropriate lesson plans for K–8 group classes across guitar, bass, ukulele, drums, and voice at multiple school sites
- Organized recurring student showcases, managing logistics and cross-team coordination

Private Music Instructor — *Independent, CA* Jan 2017 – Present

- Maintain a 9+ year independent client base by customizing instruction to individual goals and adapting communication style across a wide range of ages
- Prepare students for time-boxed deliverables (recitals, auditions, competitions) through structured, detail-oriented planning

Steward, Guest Service & Crowd Control — *Disneyland Resort, Anaheim, CA* 2018 – 2020

- Maintained smooth operations and solved problems in real time during sustained high-traffic, high-pressure conditions at one of the resort's busiest locations

EDUCATION

Web Development, A.S. (in progress) — *Long Beach City College* Expected Fall 2027

Completed: COSW 10, COSW 20 · In Progress: COSP 38, COSW 200 · Remaining: COSP 7, COSW 30, COSW 230, COSW 240

100Devs Full-Stack Web Development Program — *Self-directed* 2024

Completed roughly half of the 60+ course curriculum (HTML/CSS/JS fundamentals).

BM in Music Education – Choral/Vocal Studies — *CSULB, Bob Cole Conservatory of Music* 2017 – 2020

AA-T in Music — *Long Beach City College* 2014 – 2017
